26<sup>th</sup> September 2016

Dear Parents,

Please find attached the report of the inspection carried out by Ofsted on Tuesday 13<sup>th</sup> September.

The inspector was at preschool all day observing the children's activities, talking to parents, observing and questioning staff about policy, our roles and knowledge of learning and development in the early years.

Thank you to all the parents who were able to speak to the inspector about their experiences of preschool as this helped give her a parent's viewpoint an essential part of the inspection process.

We are very pleased with the outcome of this inspection which highlights the features of preschool that we also perceive to be important. This includes the positive experiences of the children, how their health and well-being is promoted and how the transition to school is managed well.

Of the aspects for preschool to improve we currently monitor children's progress using guidance provided by Somerset Early Years Advisory Service which focuses on age related outcomes. To enable us to further assess effectiveness of learning in preschool we will extend and develop our evaluation process. To formalise our discussions with parents on children's entry to preschool we aim to design a format for parents to describe their children's current level of development. We would welcome parents' input on the creation of a pre-entry document that can support our transition planning for the children.

Please feel free to talk to a member of staff or a member of the committee if you have any questions about the report, we really welcome any parental feedback!

Thank you for your continued support,  
With kind regards

Preschool staff and committee
